PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 4+ years of experience architecting and delivering SaaS platforms, mobile apps, and enterprise integrations across automotive, logistics, wellness, and construction industries. Skilled in React.js, React Native, TypeScript, Node.js, and REST API design, with hands-on experience building production LLM features on the Claude API (prompt engineering, RAG) and integrating complex third-party services (Google APIs, Google OAuth, Twilio, Azure AD, Keycloak, Stripe Connect, Apple/Google in-app purchases, Zoho services). Led a team of 6 engineers across full product lifecycles — from architecture and development through to deployment and post-launch support.

WORK EXPERIENCE

Freelance and Contract — Remote

Contract Team Lead – Eduwin Mis — Sep 2024 – Aug 2026

- Engineered an AI-powered cross-platform wellness app (iOS, Android, Web) with React Native/Expo and Node.js, shipping four Claude API features (journal analysis, tarot readings, personalised affirmations, two-person chart comparisons) grounded by a self-built RAG pipeline with local embeddings to keep responses accurate to source material; delivered alongside a full admin CMS.
- Built native App Store/Google Play billing with server-side receipt verification, store webhooks, and a credit ledger metering AI usage.
- Designed and delivered a 6-app on-demand delivery ecosystem (customer app, driver app, merchant apps, admin dashboard) with real-time GPS tracking via Google Maps and automated driver payouts via Stripe Connect — deployed across Canada and Australia.
- Built a multi-tenant car dealership SaaS with hierarchical access control (franchise → dealer → sales rep), automated Cargurus inventory syndication, and digital document generation with signature support.
- Integrated Google Workspace and Twilio APIs to deliver end-to-end email and SMS scheduling, multi-step automation sequences, and inbound webhook handling across multiple client platforms.
- Engineered an AI-powered cross-platform wellness app (iOS, Android, Web) using the Claude API for journal analysis and personalised affirmation generation, delivered alongside a full admin CMS.

Independent Projects — Noida/Remote

Developer/Consultant — Jan 2022 – Sep 2024

- Architected a Next.js 15 portfolio and CMS for a construction firm, featuring Framer Motion animations, separate desktop/mobile layouts, and a careers portal with application tracking.
- Built a logistics operations platform with user-level RBAC (granular permission control per action/resource), barcode inventory tracking, FullCalendar scheduling, and automated PDF/Excel report generation.
- Built a high-fidelity portfolio website for a large architecture firm; reduced initial page load from 38s to 5s through asset optimisation, lazy loading, and code splitting.
- Implemented real-time WebSocket connections for a trading application, improving data reliability and reducing stale-data incidents.
- Developed custom admin dashboards with modular, permission-based access controls and live analytics across multiple client builds.

Nagarro — Gurugram, HR

Engineer — Jan 2022 – Sep 2024

- Delivered a full-stack automotive CRM integrating 8 external APIs — Twilio, Gmail OAuth2, DocuSign, Zoho Sign, AutoGrab, Cars24, Google Sheets, and AWS S3 — with a decoupled Node.js microservice for all communication scheduling and sequencing.
- Developed a dual-portal inventory management system (admin + vendor) handling purchase orders, cycle counts, damaged goods tracking, and large catalogue performance via virtual scrolling.
- Created a logistics platform with an automated Twilio SMS gateway — scheduled messaging, multi-step sequences, inbound webhook handling, and a Bull (Redis) async job queue for reliable delivery.
- Contributed to React.js/TypeScript UI development for Generative AI tooling; integrated Keycloak, Azure AD, and Microsoft Copilot for enterprise-grade authentication and access control.
- Trained and mentored junior developers on React, Node.js, Git workflow, and code review best practices.

EDUCATION

Inderprastha Engineering College — Ghaziabad, UP
Bachelor of Technology — Aug 2018 - Jul 2022
Major in Computer Science
Cumulative GPA: 7.8/10

TECHNICAL SKILLS

Languages & Frameworks : JavaScript, TypeScript, HTML5, CSS3, SQL, Python
Frontend : React.js, Redux, MobX, Tailwind CSS, Bootstrap
Backend & APIs : Node.js, Express.js, REST APIs, WordPress API
Tools & Platforms : Git, Webpack, AWS, Keycloak, Azure, Google Maps API, Google OAuth2, Linux, Ubuntu
